Contents of Volume 1

No. 1

Editorial 1

C.R. Lowe (Cambridge, U.K.)
New developments in downstream processing (*Minireview*) 3

D.C. Ulmer, M.S.A. Leisola and A. Fiechter (Zurich, Switzerland)
Possible induction of the ligninolytic system of *Phanerochaete chrysosporium* 13

H. Toyama, T. Yokoyama, A. Shinmyo and H. Okada (Suita, Japan)
Interspecific protoplast fusion of *Trichoderma* 25

T.M. Smith, G. Saunders, L.M. Stacey and G. Holt (London, U.K.)
Restriction endonuclease map of mitochondrial DNA from *Penicillium chrysogenum* 37

G.S. Dhillon, T. Nagasawa and H. Yamada (Kyoto, Japan)
L-Cysteine-synthesizing enzyme from 3-chloro-L-alanine resistant *Bacillus sphaericus* L-118 47

No. 2

H.A. Chase (Cambridge, U.K.)
Scale-up of immunoaffinity separation processes *(Minireview)* 67

J.-H.D. Wu, L. Yang and A.L. Demain (Cambridge, MA, U.S.A.)
Further studies on the role of phenylalanine in gramicidin S biosynthesis by *Bacillus brevis* 81

J. Bader, H. Günther, S. Nagata, H.-J. Schuetz, M.-L. Link and H. Simon (Garching, F.R.G.)
Unconventional and effective methods for the regeneration of NAD(P)H in microorganisms or crude extracts of cells 95

B. Fischer, R. Claus and H.-P. Kleber (Leipzig, G.D.R.)
Isolation and characterization of the outer membrane of *Acinetobacter calcoaceticus* 111

Y. Tani, T. Yonehara, Y. Mitani and H. Yamada (Kyoto, Japan)
ATP production by sorbitol-treated cells of a methanol yeast, *Candida boidinii (Kloeckera* sp.) No. 2201 119

D.E. Rawlings, I.-M. Pretorius and D.R. Woods (Rondebosch, Republic of South Africa)
Construction of arsenic-resistant *Thiobacillus ferrooxidans* recombinant plasmids and the expression of autotrophic plasmid genes in a heterotrophic cell-free system *(Short Communication)* 129

No. 3/4

D.J. Clarke, B.C. Blake-Coleman, M.R. Calder, R.J.G. Carr and S.C. Moody (Salisbury, U.K.)
Sensors for bioreactor monitoring and control – a perspective (*Minireview*) 135

H.J. Vogel and P. Brodelius (Lund, Sweden and Zurich, Switzerland)
An in vivo ^{31}P NMR comparison of freely suspended and immobilized *Catharanthus roseus* plant cells 159

W. Kuhlmann, H.-D. Meyer, K.H. Bellgardt and K. Schügerl (Hannover, F.R.G.)
On-line analysis of yeast growth and alcohol production 171

M. Butler and R.E. Spier (Pirbright, U.K.)
The effects of glutamine utilisation and ammonia production on the growth of BHK cells in microcarrier cultures 187

I. Karube, E. Tamiya and H. Matsuoka (Yokohama, Japan)
Electrochemical estimation of protoplast population 197

H. Yamada, H. Kanzaki and T. Nagasawa (Kyoto, Japan)
Synthesis of L-cystathionine by the γ-replacement reaction of cystathionine γ-lyase from *Streptomyces phaeochromogenes* 205

A.E. Goodman, A.T. Strzelecki and P.L. Rogers (Sydney, Australia)
Formation of ethanol from lactose by *Zymomonas mobilis* 219

M.H. Boyer, J.P. Chambost, M. Magnan and J. Cattanéo (Marseilles, France)
Carboxymethyl-cellulase from *Erwinia chrysanthem*. I. Production and regulation of extracellular carboxymethyl-cellulase 229

M.H. Boyer, J.P. Chambost, M. Magnan and J. Cattanéo (Marseilles, France)
Carboxymethyl-cellulase from *Erwinia chrysanthemi*. II. Purification and partial characterization of an endo-β-1,4-glucanase 241

No. 5/6

J. Carlson and J. Messing (St. Paul, MN, U.S.A.)
Efficiency in cloning and sequencing using the single-stranded bacteriophage M13 253

M. Honjo, K. Manabe, H. Shimada, I. Mita, A. Nakayama and Y. Furutani (Mobara, Japan)
Cloning and expression of the gene for neutral protease of *Bacillus amyloliquefaciens* in *Bacillus subtilis* 265

I. Karube, T. Matsunaga, S. Suzuki, T. Asano and S. Itoh (Yokohama and Tokyo, Japan)
Immobilized antibody-based flow type enzyme immunosensor for determination of human serum albumin 279

A. Tschopp, A. Cogoli, M.L. Lewis and D.R. Morrison (Zurich, Switzerland, and Houston, TX, U.S.A.)
Bioprocessing in space: Human cells attach to beads in microgravity 287

361

N. Kato, T. Yamagami, Y. Kitayama, M. Shimao and C. Sakazawa (Tottori, Japan)
Dismutation and cross-dismutation of aldehydes, and alcohol:aldehyde oxidoreduction by resting-cells of *Pseudomonas putida* F61-a 295

Y. Kawaguchi, N. Shimizu, K. Nishimori, T. Uozumi and T. Beppu (Tokyo, Japan)
Renaturation and activation of calf prochymosin produced in an insoluble form in *Escherichia coli* 307

R. Marquardt, G. Wöhner and E.-L. Winnacker (Munich, F.R.G.)
Properties of plasmids from *Methylomonas clara* 317

M.S.A. Leisola, D.C. Ulmer, R. Waldner and A. Fiechter (Zurich, Switzerland)
Role of veratryl alcohol in lignin degradation by *Phanerochaete chrysosporium* 331

H.-P. Meyer, W. Beyeler and A. Fiechter (Zurich and Udorf, Switzerland)
Experiences with the on-line measurement of culture fluorescence during cultivation of *Bacillus subtilis*, *Escherichia coli* and *Sporotrichum thermophile* 341

M. Shaham, M. Chorev and Y. Becker (Jerusalem, Israel)
Further characterization of the ataxia-telangiectasia clastogenic factor by reversed-phase liquid chromatography *(Short Communication)* 351

H.-P. Meyer, C. Leist and A. Fiechter (Zurich, Switzerland)
Acetate formation in continuous culture of *Escherichia coli* K12 D1 on defined and complex media (*Short Communication)* 355
